Joomla  
WordPress  
Zen Cart  
Xcart  
osCommerce  
phpFox  
Drupal  
Magento  
Pinnacle  
Moodle  
PHP Bulletin Board

Joomla is an open source content management system that allows you to build

websites and power applications. You can manage all content – text, pictures, video, and documents or just about anything you can think of using Joomla on your site.

WordPress is a popular open source blogging and online publishing software. Many popular blogs on the Web today use WordPress because it is free.

Zen Cart is an online shopping cart and ecommerce software built using PHP and MySQL. It provides the merchants a host of features including product, sales and customer management.

Xcart is a PHP/MySQL based shopping cart application that offers host of features like Product Catalog, Inventory, Taxes, Sales Analysis and integration to a variety of payment methods.

osCommerce is one of most popular online shopping cart and ecommerce software that is available free. It comes with a lot of out-of-the box features and its design can be completely customized.

phpFox is a social media application with a host of features like Blogs, Video Gallery, Music Gallery, Forum, Social Book-marking. phpFox is an open source application that enables one to quickly setup a social networking site.

Drupal is one of the most popular open source content managements systems and is being used even by Fortune 500 companies. One of the striking features of Drupal is that content on a site can be managed by multiple users using this application.

Magento is an award-winning feature-rich eCommerce application that provides a great amount of flexibility not just in the look and feel of store but also in customizing the functionality.

Pinnacle cart is an ecommerce shopping cart software that provides a range of marketing options like Customer Relationship Management, Product Merchandising, Promotions and many payment options.

Moodle is an excellent platform for e-learning companies with a host of Course Management features. It is a free software that educators can use to create comprehensive online learning websites.

#### PHP Bulletin Board

phpBB is a perfect application for websites that plan to add discussion forum features to their websites. It has features like posting, replying, private messages, anonymous posting etc.

vBulletin is another forum messaging system that can be added to your website which has a wide range of features. This is developed using PHP and MySQL.

Complete Web Solutions Company providing the following services:

#### Custom Web Applications

Ritwik can offer custom web applications development across a wide range of technology platforms. The range of technologies used to develop these applications include: open source web applications, Microsoft web applications, PHP, MySQL, ASP.NET and MSSQL etc.

#### E-commerce/Shopping Cart Solutions

Ritwik's E-commerce solutions to name a few of the features include:

E-commerce website design, providing shopping cart software solutions based on popular platforms like osCommerce, X-Cart, Zen Cart, Magento, Pinnacle etc. along with payment gateway integration. We also have the expertise to deliver completely

customized E-commerce applications which can be tailored made to your business requirements.

#### Content Management Solutions (CMS)

Ritwik can build your very own content management system for your website using technologies like Microsoft ASP/ASP.net, Linux, MySQL and PHP etc. We have delivered many CMS based sites using various open source and paid content management systems like Wordpress, Joomla, Drupal. We have the expertise to customize these open source systems to suit your requirements.

#### Web and Graphic Design

We have a good creative team that can help you communicate your ideas through your website and help you create an online presence that resonates with your audience. The solutions to name a few that we offer are from designing a complete new website, website redesign/revamping regular maintenance, etc.

#### Dedicated Teams - PHP or ASP.NET

For companies that have continuous flow of work, we offer dedicated programming teams in PHP/MySQL and ASP.NET/MSSQL. Having a dedicated team offers you flexibility to schedule your work according to your needs.

#### Social Media and Forum Development

Having social media features and a forum helps a website to attract visitors more frequently, therefore increasing the chances of converting those visits to revenue. We implement forums like phpBB, vBulletin and social media applications like phpFoX.

#### Open Source Development Expertise

Due to lower cost of ownership, many of our customers prefer to use Open Source Technologies for their projects. We at Ritwik offer expertise in the following most commonly used applications which can be customized to your needs:WordPress , Zen Cart , X-Cart , osCommerce , phpFoX , Drupal , Magento , Pinnacle Cart , Moodle , phpBB , vBulletin ,
